

Bio2Skin

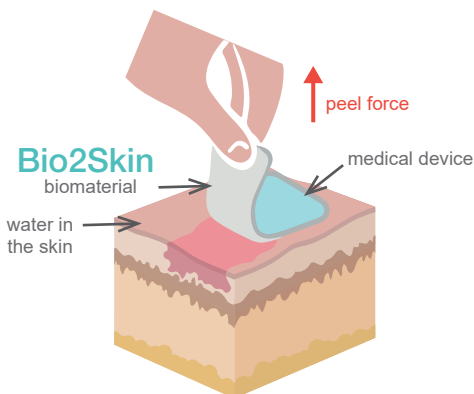

Strong and Gentle Adhesive to Skin

WHAT IS BIO2SKIN?

Bio2Skin is an Innovative Medical Adhesive Biomaterial, providing a new generation of medical adhesives and a new line of products that can offering effective protection against Medical Adhesive-Related Skin Injuries (MARSI).

HOW DOES IT WORK?

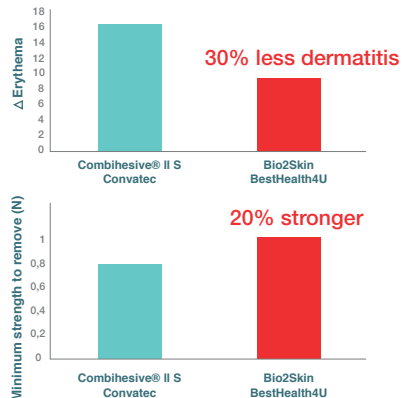

It adheres to the skin by interacting with the water molecules present in the skin surface, ensuring a safe and complete removal of the adhesive without damaging the integrity of the skin.

BENEFITS

- Low stripping
- Good adhesion strength
- Residue-free
- Non-irritant
- Flexible
- Transparent formulation
