MEMBERSHIP REGIME

P-BIO accepts as members entities dedicated to R&D, production, marketing, and/or commercialization of biotechnology products or services, or those that contribute directly or indirectly to the development of the Portuguese biotechnology sector, within one of the following categories:

BIOTECH COMPANIES

CRITERIA

Only companies with independent legal status are eligible for admission; therefore, centers, departments, laboratories, branches, offices, etc., that do not have legal status (i.e., that do not have their own tax identification number, distinct from the organization to which they belong) cannot be considered full members.

ADDITIONAL DOCUMENTATION

Certification is granted upon presentation of a copy of the commercial register or, for domestic companies, upon provision of the permanent certificate code for consultation on the website www.empresonline.pt.

MEMBERSHIP FEES

The membership fee for Biotech Companies is determined by "Total Income" or "Total Assets", using the indicator that corresponds to the highest share, according to Table 1. Companies that have at least one medicine with a marketing authorization (national or international) cannot be considered in Level 1.

OTHER ENTITIES

CRITERIA

Other relevant actors in the National Innovation System are also eligible, including those that directly or indirectly contribute to the national biotechnology sector, such as universities, research institutes, scientific associations, foundations, technology transfer offices, venture capital or asset management firms, non-profit associations, etc., provided they have their own legal personality.

MEMBERSHIP FEES

Members included in this category benefit from a single level fee (Level 7), in accordance with Table 1.

Admission of individual members is not allowed.
